

Stormwater Manual dated January 1, 2009

The 2009 manual reflects the following changes made to the 2005 manual.

Section 1.4.12 – New requirements added regarding coordination with the National Flood Insurance Program.

Section 1.5.6 – Last paragraph deleted regarding lowest floor elevations. This is covered in Article 19 of the Zoning Ordinance.

Section 2.4.1 – FEMA – Second paragraph revised to address changes to the shape of the floodplain.

Section 11.2.4 – Concrete washout pits added as a required sediment control practice.

Section 11.3.6 – New requirement added for conducting a progress meeting after pipe crews have finished their work. New requirement added for placing orange safety fence around each storm sewer and sanitary sewer manhole.

Section 11.4.6 – New requirement added that extends the length of a construction entrance to 100' where practical.

Section 11.5.10 – New section added regarding Concrete Washout Pits.
